

✓ Static shelving

Static shelving is designed with depths from 12" to 24". Product is either placed directly on the shelving. Static shelving is one of the most economical and is the best method.

✓ Carton flow rack

There are small sections of conveyor mounted at an angle. Product is stocked from the rear of the flow rack and picking is done from the face. Product can be stocked in cartons or small totes or bins. As a carton or tote is emptied, it is removed from the rack and another one will roll into place

✓ Carousels

Pick-to-light systems consist of lights and LED displays for each pick location. The system uses software to light the next pick and display the quantity to pick. Pick-to-light systems have the advantage of not only increasing accuracy, but also increasing productivity.

✓ Bar-code scanners

Though very useful in increasing accuracy levels, bar-code scanners in a fast-paced piece-pick operation tend to become cumbersome and can significantly reduce your pick rates.

✓ Voice-directed picking

Voice technology has come of age in recent years and is now a very viable solution for piece pick, case pick, or pallet pick operations.

✓ Automated conveyor and sortation Systems

- Automated conveyor systems and sortation systems will be integral to any large-scale piece-pick operation. The variety of equipment and system designs is enormous.
